<b>27-30°F</b>	<b>15-20°F</b>	<b>W 8-12 MPH</b>	<b>Both Salt/Plow</b>	<b>Yes Pretreat</b>

# Additional Details

## Expected Hazards

- Light snowfall is expected
- Wind chills will be chilly but not hazardous.

## Start/Stop Time Concerns

Times could vary by a few hours if the system moves in a little later than anticipated. This was decently modeled and timing has been rather consistent.

## Other Details

If the system ends up tracking a little further south (25 miles or more), the snowfall forecast will drop considerably. If this were to occur, snowfall amounts would be closer to 1", with just pre-treating and salting needed to keep pavement clear of accumulating snowfall. With the area on the northern end of the system, any shift to the south will have an impact on expected snowfall with snowfall amounts diminishing from north to south across the area.
