<p>Additional Details</p> <p>Rain & thunderstorms moves through from about 10 AM onward through 2 PM. While severe weather isn't expected, rain could be heavy and create some flooding issues in areas, especially given the recent rainfall and saturated ground.</p>	<p>Additional Details</p> <p>Friday looks dry with partly cloudy skies. The grass will likely be wet in many area through the morning from Thursday's rainfall. The ground will be soggy in areas of poor drainage.</p>
